

# Project Map

## Your Input

It is important that the community stay involved in the project. Area residents have knowledge and experience that could influence and improve the project aesthetics and multi-use features. Please stay involved in the project by visiting the District's web site and talking to the project team, City Council representatives and the City of Peoria project staff about your questions and concerns. You are also encouraged to submit comments regarding the pedestrian bridge and/or other issues to City staff listed below.

## Providing Value to the Community with:

- Flood Protection
- Landscape Enhancements
- Recreational Opportunities
- Continuation of Existing Trails
- Regional Connectivity

## Cost Sharing

The project will be funded jointly by the Flood Control District of Maricopa County (District) and the City of Peoria. By constructing the trails and implementing the landscape improvements in conjunction with the channel improvements, both agencies will be able to stretch public funds farther. Coordination between Peoria's Rio Vista Park improvements and the river trail system design will also help to maximize the recreation benefit.

## The District's Vision

The District's vision is for the residents of Maricopa County and future generations to have the maximum level of protection from the effects of flooding through fiscally responsible flood control actions and multi-use facilities that complement and enhance the beauty of our desert environment.

## Project Schedule

Begin Design	Complete Pre-Design Study	Final Design Complete	Channel/Trail Improvements and Construction
August 2003	December 2003	August 2004	2005
